World's First Office Electric for Personal Use!

NEW ROYAL ULTRONIC™

With Electric Carriage Return and Six Other Fully-Electric Features

Rugged, Full-Powered and Versatile.
For Home, Professional or Office Use.

This is the beginning of a new generation in the typewriter field. A *full-featured* electric that's big enough to handle the toughest typing chores, but trim enough to move from room to room. Packed with power-to-spare. Built to operate perfectly at professional speeds or at a hunt-and-peck pace. And priced to cost just a little more than lightweight partial electrics.

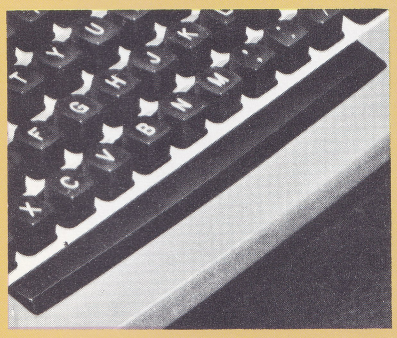
Another step ahead by the brand that has led the field since typewriters were born. ROYAL®

ROYAL ULTRONIC™

Office Electric performance in a new personal size. And it's a Royal!

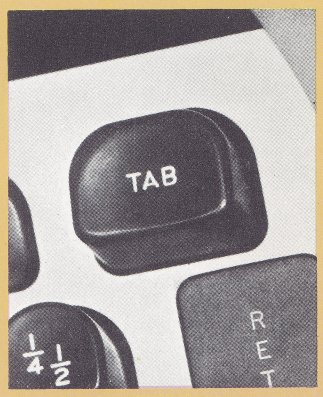
There are no half-way measures here! Every important control on the Royal Ultronic is fully electric. Essentials. Conveniences. Everything. There's never been so much ability built into a typewriter this size before!

Fully-Electric Carriage Return. Here's where all the semi-electrics fall down on the job. And here's where the Royal Ultronic shows what it's made of! This key moves your carriage, returns it to the margin automatically, advances the cylinder to the next writing line. Without any extra effort. Without any arm-swinging too!



Fully-Electric Repeat Space Bar. Touch the space bar, apply slight extra pressure and you'll automatically repeat as many spaces as you want.

Fully-Electric Repeat Keys (x) (.) (-) (_). Place your finger on the key with slight extra pressure, hold it there and you'll automatically repeat as many times as you wish.



Fully-Electric Tabulator. Located right on the keyboard . . . and it operates at a mere 1/8th the finger pressure of manual tabulators.

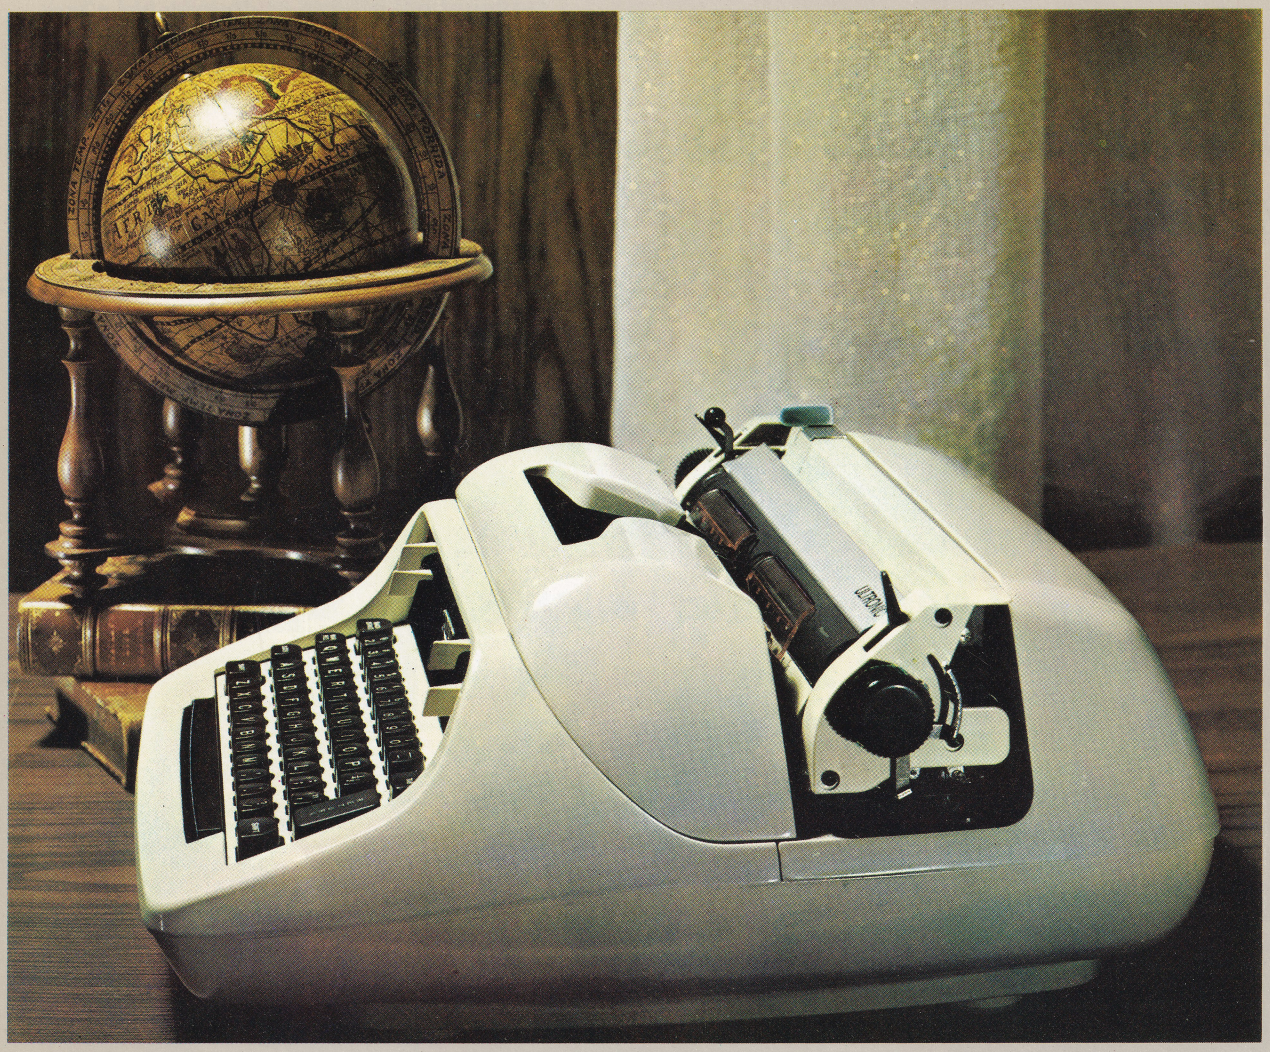
Fully-Electric Ribbon Feed. The ribbon advances electrically as you type, without tension or stretching. This means the clearest, sharpest typing impressions, longer ribbon life.

Fully-Electric Back Space, Fully-Electric Pivot Shift. Just a light touch and electric power turns your directions into actions, faster than any comparable electric!

Magic® Margin Controls. Set both margins automatically with full-size controls located right up front within finger reach of the keyboard.

PLUS

Magic® Meter Scale. Roll 'n' Ready Paper Feed. Finger-formed keys. Detachable power cord. Tempered steel type bars. Heavy duty carriage rails. Optional carrying case.



Royal Ultronic can do all the things electric typewriters *should* do, plus a lot of things the biggest manuals and portable electrics can't. *Without strain.*

Use it often; or for only half an hour a week. Type as fast as you can or as slow as you have to. Royal Ultronic is flexible enough to suit a variety of typing requirements. *Type just one line on it and see how well it fits yours.*
